

LU02.L02 - Eingaben

Python

```
input_string= input('Give a string:')
input_integer = int(input('Give an integer:'))
input_float = float(input('Give a float:'))
print('You gave the string ' + input_string)
print('You gave the integer ' + str(input_integer))
print('You gave the float ' + str(input_float))
```
