

# LU02.L03 - Summen

## Python

```
number1 = float(input('Erste Zahl:'))
number2 = float(input('Zweite Zahl:'))
number3 = float(input('Dritte Zahl:'))
print(str(number1) + ' + ' + str(number2) + ' = ' + str(number1 + number2))
print(str(number1) + ' + ' + str(number3) + ' = ' + str(number1 + number3))
print(str(number2) + ' + ' + str(number3) + ' = ' + str(number2 + number3))
print(str(number1) + ' + ' + str(number2) + ' + ' + str(number3) + ' = ' +
      str(number1 + number2 + number3))
```
