

LU99.L03: Vielfache von 3 und 5

```
def main():  
    limit = int(input(''))  
    total = 0  
    number = 1  
  
    while number < limit:  
        if number % 3 == 0 or number % 5 == 0:  
            total += number  
            number += 1  
  
    print(total)
```
