LU05.L02: Exception fangen und verarbeiten

catch_exception.py

```
"""
A simple program to demonstrate except
"""
from namelist import NameList

def main():
    """ main function for running the code """
    name_list = NameList()
    try:
        for idx in range(6):
            print(name_list.take_name(idx))
    except IndexError as idx_error:
        print(idx_error)

if __name__ == '__main__':
    main()
```
