

LU01.S04 - Installation and Configuration POSTMAN Frontend Simulation

Assignments

1. Go to the POSTMAN website and download the required software version.
2. Start the installation process.
3. Once the installation is complete, start the application and study the possibilities, as marked in the following image.

The screenshot shows the Postman application interface. On the left, there's a sidebar with 'My Workspace' containing 'Collections' (with 'FirstConnection' highlighted), 'Environments', and 'History'. The main area shows a collection named 'FirstConnection' with one item: a 'GET' request to 'http://localhost:3000/'. The 'Send' button is highlighted with a red circle. Below the request, the 'Body' tab is selected, showing the raw HTML response:

```

1 <!DOCTYPE html>
2 <html lang="en">
3
4 <head>
5   <meta charset="utf-8">
6   <title>Error</title>
7 </head>
8
9 <body>
10  <pre>Cannot GET /</pre>
11 </body>
12

```

The status bar at the bottom indicates '404 Not Found'.
