# LU01b - Exams & Weighting

### Learning objectives

- 1. Naming the dates for the three examinations that will take place in module 291.
- 2. Identification of the aids that are permitted during the three tests.
- 3. Know how each exam is weighted to calculate the module grade

### **Elements & weighting of the exams**

The grading of the modul is composed of twoexam elements, with the follwing weighting of each

#### Exams 1

• Length: about 80 minutes

Weighting: 40%Form: IndividualWork type: Moodle

• Supplementary aids: Cheatsheet

#### Exams 2

Preperation: 6-8 lessonLength: 10-15 minutes

Weighting: 60%Form: PresentationWork type: Partner

• Supplementary aids: Open books

### **Example for calculating the modul grade**

In the first exam Leo/Lea achieved 4.5, but in the exam 2 Lea/Leo was more focused and therefore got a 5.5. The modul grade is in that case calculated as follows:

```
Modul grade of Leo/Lea = 0.4 * Exam1 + 0.6 * Exam2
= 0.4*4.5 + 0.6*5.8
= 1.8 + 3.48 = 5.28
```

The calcualted 5.28 is mathematically rounded up to a 5.5. Congratulations to Lea/Leo, the effort in the 2nd part of the module was worth it for Leo/Lea, wasn't it. She really smashed it!!!
