LU01b - Exams & Weighting

Learning objectives

1. Naming the dates for the three examinations that will take place in module 291.
2. Identification of the aids that are permitted during the three tests.
3. Know how each exam is weighted to calculate the module grade

Elements & weighting of the exams

The grading of the modul is composed of twoexam elements, with the follwing weighting of each

Exams 1

- Length: about 80 minutes
- Weighting: 40%
- Form: Individual
- Work type: Moodle
- Supplementary aids: Cheatsheet

Exams 2

- Preperation: 6-8 lesson
- Length: 10-15 minutes
- Weighting: 60%
- Form: Presentation
- Work type: Partner
- Supplementary aids: Open books

Example for calculating the modul grade

In the first exam Leo/Lea achieved 4.5, but in the exam 2 Lea/Leo was more focused and therefore got a 5.5. The modul grade is in that case calculated as follows:

```
Modul grade of Leo/Lea = 0.4 * Exam1 + 0.6 * Exam2
= 0.4*4.5 + 0.6*5.8
= 1.8 + 3.48 = 5.28
```

The calcualted 5.28 is mathematically rounded up to a 5.5. Congratulations to Lea/Leo, the effort in the 2nd part of the module was worth it for Leo/Lea, wasn't it.

Vocabulary

English	German
weighting	Gewichtung
to be composed of sth.	aus etwas zusammengesetzt sein
supplementary material/aids	Hilfsmittel
