LU01c - Required software & how to install them

Before we get down to the practical work, we need to install various software. The following list contains the required tools and the purpose of each package:

Software from M290

The main part of the exercises during the modul 291 is conducted within the codeeditor Webstorm, which we already have installed during the modul 290.

Software	Description	Download-Source
Webstorm	Editor Code editor in order to program the source code such for database tables and server	Webstorm
MySQL	Database, storage and management of data. Please note, that the MySQL database is may be required in the second half of the modul and will therefore be topic in due course.	MySQL
Vue.js	Vue.js locally installed. It is also possible to receive it from a CDN (Content Delivery Network).	vuejs.org

The following installation instructions are only required if you do not have an advanced editor such as Webstorm. But luckily you do. Aren't we lucky?!

Installation Videotutorial for Windows
