The W3School offers us a range of useful tutorials that are both well structured and freely accessible. As shown in the image below, the W3 School tutorials website offers various features.

Area	function	description
upper part of the window	the navigation bar	vue can be found on the far right-hand side
left menu	all sub chapters of the tutorial	including practical exercises and control questions

If we **start learning vue now** we get to the details area of the vue tutorial, as visible in the image below:

The screenshot shows a navigation menu at the top with categories like 'HOW TO', 'W3.CSS', 'C', 'C++', 'C#', 'BOOTSTRAP', 'REACT', 'MYSQL', 'JQUERY', 'EXCEL', 'XML', 'DJANGO', 'NUMPY', and 'PANDA'. The main content area lists several Vue.js directives: **v-bind** (circled in red), **v-if**, **v-show**, **v-for**, **v-on**, and **v-model**. The left sidebar contains a 'Vue Reference' section and a 'Vue Examples' section (circled in red). Below the main content, there is a section titled 'Example: The v-bind Directive' (circled in red) which explains that the browser finds what class to connect the <div> element to from the Vue instance. Below this is a code block showing HTML and CSS for an example.

```

<!DOCTYPE html>
<html lang="en">
<head>
  <style>
    .pinkBG {
      background-color: lightpink;
    }
  </style>

  <div id="app">
    <div v-bind:class="vueClass"></div>
