Source

- Code-example: v-bind Directive

Assignments

1. box-colour change

1. Test the given script
2. Create a new CSS-Class *blueBG* in analogy to *pinkBG*). Make sure to belabour the DIVs within the script part as well.
3. Execute your script by having it *run*.
4. Toggle for testing purpose within your VUE-APP (in the script part) between the blue and pink.

2. extended CSS

1. create another css-class *.extended„ - redifine the bgColor - add additional values for color, font-size, font-family, ... - Bind this new css-class* .extended *into the HTML-Dom (script-part) - Execute your script by having it* run. ***3. Save the results*** *- Comment your results as you find fit within the html-comment area - Save your solution within W3-Save-Area. * Therefore you might need a W3-School-Account. * Be advised to name you script accordingly, i.e.* 20250203_vueDirectives_01. *This will be helpful when preparing for the exams. ===== Solution ===== Lösung ===== Vocabulary ===== ^ English ^ German ^ | as well|*
