LU05.A06 - v-bind with shorthand

Prerequisites

- Work type: Individual
- Means of aid: only teaching materials, no websearch, no use of ai.
- Timeframe: 10 Minutes
- Expected result: Script that used the v-bind in the short-hand version.

Learning objectives

1. Be able to bind ressources with the shorthand version of v-bind
2. Understanding the interaction of the SFC concept (single file component)

Source

- Code-example: v-bind Directive shorthand

Assignment

1. Open the URL with the exercise, which is given above.
2. Add to the *style-area* a new class *myClass2* with the *background-color: red*
3. Add a new *div* which incorporates the second style element.
4. **Toggle manually** within the *script* area with the values *true* and *false*, which activates and deactivates whether the style are being used or not. That means set the value manuelly to *true* or *false*
5. Execute your script by having it *run*.
6. Save your solution accordingly. Therefore you might need a W3-School-Account.

Solution

Lösung

Vocabulary

English	German
to incorporate	einbauen, einbeziehen
