Assignment

The first assignment checked by using v-if whether a certain variable was checked or not (true/false) Bei der ersten Aufgabe hat v-if binären Werte (true/false) geprüft. Now, we want to go one step further and check not only whether it is true or false, but moreover which value it contains. By this, we would be able to tell the customer of how many typewriters we have in stock, which may be of some benefit for the customer as well as for us.

1. Change the value of the variable `typewriter` to 0 und execute the script.
2. Note your realisations as a html-comment.
3. Change the content of the variable `typeWriter`, to -1. - *What happens, if the value typeWiter has no value at all respectively is empty?* - Note your realisations as a html-comment. - Save your script accordingly, whether in your W3School workspace or on you local computer in your code-editor Webstorm. ===== Solution ===== Lösung ===== Assignment 2: local src ===== - Download another picture of your choice. - Create in your W3 workspace a directory media and save the downloaded picture there - overwrite the url in the app to display your new local picture - Execute your script by having it run. - Save your solution accordingly. Therefore you might need a W3-School-Account. ===== Solution ===== Lösung ===== Vocabulary
