- Timeframe: 15 Minutes
- Expected result: A Vue script that displays HTML elements based on input values.

Learning objectives

- 1. Explaining the The directive *v*-*if* in your own word.
- 2. Being able to apply v-if in combination wit a function

Source

- Code-example: v-if pizza 1
- Code-example: v-if pizza 2

Assignment 1

As we are now capable to use v-if with logical values (true/false), and furthermore check actual values e.g. numbers, this assignment is about hoch to check stings (words). For this we are going touse the function text.includes() within our v-if. - Execute the script. As you can see the content of the variable text is displayed on the screen. - Now delete the word Pizza from the variable text. Execute your script again. - Note your realisations as a html-comment. - Save your script acoordingly, whether in your W3School workspace or on you local computer in your code-editor Webstorm ===== Assignment 2 ==== In the if paragraph there is a image of a pizza displayed as well. - Add a section v-else with a according img-tag which shows a different image than a pizza.

- 1. Note your realisations as a html-comment.
- 2. Save your script acoordingly, whether in your W3School workspace or on you local computer in your code-editor Webstorm
