

# LU05.A16 - v-for list rendering with index

## Prerequisites

- Work type: Individual
- Means of aid: only teaching materials, no websearch, no use of ai.
- Timeframe: 10 Minutes
- Expected result: A Vue script that uses the v-for directive

## Learning objectives

1. Be able to explain the objective of v-for
2. Displaying the index and corresponding array entry using v-for.
3. Displaying array elements and the corresponding images with v-for.

## Source

- [v-for code-example](#)

## Assignment

It can happen, that we need not only to display the images of our products, but want also to provide additional information to them. That invariably leads to having to handle two or more arrays in our source code.

1. Go to the link to the task mentioned in the source and save it with the appropriate name in your W3School workspace.
2. Add a second array called **comments** with the status of each food:
  - you like it: **OK**
  - you don't like it: **NOK**
3. Display the new status to each food within the v-for directive

## Solution

[Lösung](#)

## Vocabulary

English	German
bulb	Glühbirne
