

LU05.S06 - v-bind with shorthand

Assignment

1. Open the URL with the exercise, which is given above.
2. Add to the *style-area* a new class *myClass2* with the *background-color: red*
3. Add a new *div* which incorporates the second style element.
4. **Toggle manually** within the *script* area with the values *true* and *false*, which activates and deactivates whether the style are being used or not. That means set the value manuelly to *true* or *false*
5. Execute your script by having it *run*.
6. Save your solution accordingly. Therefore you might need a W3-School-Account.

Sourcecode of the solution

Sourcecode of the solution

Your solution is supposed to look like the following image:

```

padding: 20px;
border: dashed black 1px;
}

.myClass {
  background-color: lightcoral;
}
.myClass2 {
  background-color: red;
}

</style>
</head>
<body>

<h1>Example: 'v-bind:' shorthand form ':'.</h1>
<p>Take a look at the div where the class is set with the 'v-bind:' shorthand form ':'.</p>
<div id="app">
  <!-- Kürzschreibweise des v-bind-Befehls -->
  <div :class="{ myClass: isImportant }">
    Importance visualized by background color
  </div>
  <div :class="{ myClass2: isImportant }">
    Importance visualized by background color
  </div>
</div>
</div>

<script src="https://unpkg.com/vue@3/dist/vue.global.js"></script>
<script>
  const app = Vue.createApp({
    data() {
      return {
        isImportant: true
      }
    }
  })
  app.mount('#app')
</script>

```

Example: 'v-bind:' shorthand form ':'.

Take a look at the div where the class is set with the 'v-bind:' shorthand form ':'.

Importance visualized by background color

Importance visualized by background color
