

LU05.S07 - v-if (simple)

Sourcecode of the solution

Sourcecode of the solution

Assignment

In the script area of the W3-School example (link above) you will find a variable *typewritersInStock* with the value *true*. In the html area of the same script there will be decided, what is supposed to happen in which case. In the *true*-case there are typewriters on stock, and in the else-case (v-else) they are not.

1. Change the value of the variable *typewritersInStock* to *false* and run the script.
2. Note your realisations as a html-comment?
3. Save your script accordingly, whether in your W3School workspace or on you local computer in your code-editor Webstorm.

The screenshot shows a web browser window with the URL <https://demirvh.w3spaces.com/v-bind/LU05s05.html>. The page title is "Example with 'v-if' and 'v-else'". The browser output shows "not in stock".

The code in the editor is as follows:

```

22 | Die erlaubt es uns unsere Check genauer zu gestalten -->
23 |
24 | <div id="app">
25 |   <p v-if="typewriterCount>0">
26 |     <!-- Wenn der Counter kleiner 0 ist, gibt es nichts mehr auf Lager -->
27 |     in stock
28 |   </p>
29 |   <!-- Wenn der Counter kleiner grösser 0 ist, gibt es Lagerbestände -->
30 |   <p v-else>
31 |     not in stock
32 |   </p>
33 |   <!-- Wenn die Variable nicht gesetzt ist, ist vue aufgeschmissen
34 |   Es werden alle <p> nach html-standards nacheinander abgearbeitet -->
35 | </div>
36 |
37 | <script src="https://unpkg.com/vue@3/dist/vue.global.js"></script>
38 | <script>
39 |   const app = Vue.createApp({
40 |     data() {
41 |       return {
42 |         // testwerte
43 |         typewriterCount: -1
44 |         // 0 = false
45 |         // 1 = true
46 |         // -1 = true
47 |         // -100 = true
48 |         // if there is no number stored in the variable the both messages are shown
49 |         // conclusion: 0 is similar to false
50 |         // any other number is similar to true
51 |       }
52 |     }
53 |   })
54 |   app.mount('#app')
55 |

```
