

LU05.S09 - v-if with logical operators

Sourcecode of the solution

- Sourcecode of the solution

Assignment

In the script area of the W3-School example (link above) you will find a variable *typewritersInStock* with the value *true*. In the html area of the same script there will be decided, what is supposed to happen in which case. In the *true*-case there are typewriters on stock, and in the else-case (v-else) they are not.

1. Change the value of the variable *typewritersInStock* to *false* and run the script.
2. Note your realisations as a html-comment?
3. Save your script accordingly, whether in your W3School workspace or on you local computer in your code-editor Webstorm.

```

background-color: lightgreen;
}
</style>
</head>
<body>
<h1>Example with 'v-if', 'v-else-if' and 'v-else'</h1>
<p>Try changing the 'typewriterCount' value in the Vue instance to '0' or '5' and run the code again.</p>
<h2>We sell typewriters</h2>

<div id="app">
  <p v-if="typewriterCount>10">
    Plenty in stock
  <p v-else-if=" typewriterCount>3">
    In stock
  <p v-else-if="typewriterCount>0">
    Very few left!
  <p v-else>
    Not in stock
  </p>
</div>
<script src="https://unpkg.com/vue@3/dist/vue.global.js"></script>
<script>
const app = Vue.createApp({
  data() {
    return {
      typewriterCount: 11
    }
  }
})
app.mount('#app')
</script>

```

The screenshot shows a web page titled "Example with 'v-if', 'v-else-if' and 'v-else'". It contains a heading "We sell typewriters" and an image of a red typewriter. Below the image, there is a green box with the text "Plenty in stock".
