

LU05.S14 - v-for

Hints

- Download the file and copy the content into the code area of the W3School on the left hand side of the coding window.
- You can execute the code by pressing the *run* button
- The result will be presented in the right hand side of the window.

Codesolution of v-show simple

The screenshot shows the W3Schools Vue.js editor interface. On the left, a file list includes LU05.s13.html, LU05.s14.html (selected), LU05s02.html, LU05s03.html, LU05s04.html, LU05s05.html, LU05s06.html, and lu05s07.html. The main code editor contains:

```

24 <div>
25   <p v-show="showText">This div tag can be hidden<br/>
26   <p v-if="showImg">The Image can likewise be hidden<br/>
27 </div>
28
29 <script src="https://unpkg.com/vue@3/dist/vue.global.js">
30 </script>
31 const app = Vue.createApp({
32   data() {
33     return {
34       showText: false,
35       showImg: false
36     }
37   }
38   <!-- here are 4 options possible -->
39   <!-- 1. showText: true, showImg: true -->
40   <!-- 2. showText: true, showImg: false -->
41   <!-- 3. showText: false, showImg: true -->
42   <!-- 4. showText: false, showImg: false -->

```

The browser output on the right shows the title "Example: v-show Visibility of Div Element". It includes a note: "Find the 'showDiv' data property in the code, change it to 'false', and run the code again." Below this, a red box highlights a note in red text: "While v-show hides the text, the v-if destroys the resources in the html-dom". The browser's developer tools sidebar is also visible.
