

LU05.S17 - v-for with 2-dimensional arrays and v-if

Hints

- Download the file and copy the content into the code area of the W3School on the left hand side of the coding window.
- You can execute the code by pressing the *run* button
- The result will be presented in the right hand side of the window.

Source code

Source code of the solution

```
<div>
  <figure v-for="x in manyFoods">
    <div v-if="x.comm === 'OK'">
      
      <figcaption align='middle' style="color:red;"> I love {{x.name}} ! </figcaption>
    </div>
    <div v-else>
      <figcaption align='middle' style="color:green;"> I don't like {{x.name}} !! </figcaption>
    </div>
  </figure>
</div>
|
</div>

<script src="https://unpkg.com/vue@3/dist/vue.global.js"></script>

<script>
  const app = Vue.createApp({
    data() {
      return {
        // the array manyfoods was extended by a new column "comm"
        // the column-name was change to "img"
        manyFoods: [
          {img: 'img_burrito.svg', name: 'Burrito', comm: 'OK'},
          {img: 'img_salad.svg', name: 'Salad', comm: 'OK'},
          {img: 'img_cake.svg', name: 'Cake', comm: 'NOK'},
          {img: 'img_soup.svg', name: 'Soup', comm: 'NOK'},
          {img: 'img_fish.svg', name: 'Fish', comm: 'OK'},
          {img: 'img_pizza.svg', name: 'Pizza', comm: 'OK'},
          {img: 'img_rice.svg', name: 'Rize', comm: 'NOK'}
        ]
      }
    }
  })
</script>
```

Example 'v-for' to create images and text

The 'v-for' directive is used to create images and text based on the 'manyFoods' array in the Vue instance.

Food Item	Text
Burrito	I love Burrito !
Salad	I love Salad !
Cake	I don't like cake !!
Soup	I don't like Soup !!
Fish	I love Fish !
Pizza	I love Pizza !
Rize	I don't like Rize !!
