

# LU05c - v-bind practical application in Webstorm - TBD

## Learning objectives

1. Be able to apply the v-bind directives within Webstorm
2. Using the SFC concept in Webstorm / reality

## Introduction

After practising our new vue powers in the tutorials website W3School, it is high time to transfer our v-bind powers to a more practical and realistic environment such as Webstorm.

This task is both more challenging and more engaging at the same time, since it requires additional skill as we have not only to program vue code but also to handle server starts and stops, ports and browser-calls as well. But first things first.

In this chapter we are going to start with our „Hello World“ to Webstorm. I hope you are ready!!!

## TDB

## Vocabulary

English	German
