LU05c - v-bind practical application in Webstorm - TBD

Learning ojectives

1. Be able to apply the v-bind directives within Webstorm
2. Using the SFC concept in Webstorm / reality

Introduction

After practising our new vue powers in the tutorials webseite W3School, it is high time to transfer our v-bind powers to a more practical and realistic enviroment such as Webstorm.

This task is both more challanging and more enganging at the same time, since it requires additional skill as we have not only to programm vue code but also to handle server starts and stops, ports and browser-calls as well. But first things first.

In this chapter we are going to start with our „Hello World" to Webstorm. I hope you are ready!!!
