Source

- Code-example: Example code for events

Assignment A

1. Take the solution from the previous assignment and name it correctly including the <h1>: **lu06.s03.html**

Assgignment B

We currently have a single function for adding and subtracting. Dies wollen wir ändern. Create a second method removeMoose that reduces the number of moose.

Passen Sie den Aufruf der Methode im HTML-Bereich entsprechend an. Note: The call in Button of addMoose must be replaced by removeMoose in the negative case.

Testen Sie den Aufruf der Methode im HTML-Bereich entsprechend an. Note: The call of addMoose must be replaced by removeMoose in the negative case.

Add further buttons. The aim is to add and subtract the values +1, +5, +10, -1, -5 and -10.

Test the call of the method in the HTML area accordingly.
