

# LU06.A05 - Events - Input counting

## Prerequisites

- Work type: Individual
- Means of aid: only teaching materials, no websearch, no use of ai.
- Timeframe: 10 Minutes
- Expected result: a vue script, that counts how many letters were typed in by the user and decreases and resets the counter.

## Source

- [Source-code for the assignment](#)

## Assignments

1. Test the code example provided to you, if you type something into the input-field the counter must increase. Describe the behaviour of the script using HTML comments.
2. Make sure that you have the title `<h1>` correctly named: **lu06.s05.html**
3. Add a button **InpCnt -1** that decreases the counter by step-size 1
4. Add another button to reset the counter to 0.
