1. Test the code example provided to you, if you type something into the input-field the counter must increase. Describe the behaviour of the script using HTML comments.
2. Make sure that you have the title `<h1>` correctly named: **lu06.s05.html**
3. Add a button **InpCnt -1** that decreases the counter by step-size 1
4. Add another button to reset the counter to 0.

```
