

# LU07.S03 - Methods with several arguments

## Assignment

- 01: Test the code example above which was provided to you. Describe the behaviour of the script using HTML comments.
- 02: Make sure that everything is working correctly: When clicking on the tiger image there must appear a text below the image „Hello, tiger“.
- 03: Make sure that you have the title `<h1>` and have correctly named the file: **lu07.s0s.html**
- 04: : You need to wo more animals to the list and greet them correspondingly to the provided example.

## Solution

The screenshot shows a code editor with the following code:

```

<!-- clickin the image triggers the call of the method with the arguments event, greeting, opinion -->

<p id="green">{{ msgAndId }}</p>

<script src="https://unpkg.com/vue@3/dist/vue.global.js"></script>
<script>
const app = Vue.createApp({ rootComponent: {
  data() {
    return {
      msgAndId: ''
    }
  },
  methods: {
    myMethod(e, msg, opp) { // signature of the method including argument list
      this.msgAndId = msg + ', ' // message to show is built up, step by step
      this.msgAndId += e.target.id + "!"
      this.msgAndId += ' You look ' + opp;
    }
  }
}});
app.mount('#app');

```

The output shows three animal images (tiger, lion, and a bird) with their corresponding greetings below them: "Hello, Lion! You look kingly indeed".
