

# LU07.A03 - Events - TBD

## Assignment 1: Preparatory work

• ...

## Solution

The screenshot displays a code editor with the following code:

```

<!-- clickin the image triggers the call of the method with the arguments event, greeting, opinion -->
<div id="app">
  
  
  <p id="green">{{ msgAndId }}</p>
</div>
<script src="https://unpkg.com/vue@3/dist/vue.global.js"></script>
<script>
const app = Vue.createApp({rootComponent: {
  data() {
    return {
      msgAndId: ''
    }
  },
  methods: {
    myMethod(e, msg, opp) { // signature of the method including argument list
      this.msgAndId = msg + ', ' // message to show is built up, step by stepp
      this.msgAndId += e.target.id + '! '
      this.msgAndId += ' You look ' + opp;
    }
  }
});
app.mount('#app');

```

The preview on the right shows three images: a tiger, a lion, and a bird. Below the images is a text box containing the output: "Hello Lion You look kingly indeed". Red boxes highlight the image IDs in the code, the corresponding image in the preview, and the output text. Red arrows connect these elements to show the flow of data.
