

LU07.A03 - Events - TBD

Assignment 1: Preparatory work

• ...

Solution

Methods with several arguments

In this example we see that it is possible to send both the event object and a text as an argument with a method. To do this we must use the reserved name for event methods: 'Sevent'.

Click on the image of the animals above, go to get a proper response:

Preview text: "Hello Lion You look kingly indeed"

```

<p id="green">{{ msgAndId }}</p>

const app = Vue.createApp({
  data() {
    return {
      msgAndId: ''
    }
  },
  methods: {
    myMethod(e, msg, opp) { // signature of the method including argument list
      this.msgAndId = msg + ', ' // message to show is built up, step by step
      this.msgAndId += e.target.id + '! '
      this.msgAndId += ' You look ' + opp;
    }
  }
})

```
