LU02c - Microservice

Objectives

1. I can explain the terms `Monolithic` and `Microservice` architecture by using my own words.
2. I'm able to count (at least four) advantages and disadvantages for these architectures.
3. I'm able to count (at least three) use cases for these architectures.

Basics

In this article, you will learn about - about the differences between Centralized and Distributed Systems - what characteristics, components and examples for each architecture exist
