LU04e - Running K8s services by declaration

Goals

1. I'm able to declare an action in K8s with a YAML-file.
2. I'm to export the YAML configuration from a running K8s deployment.
3. I can suggest and implement at least one measure when an error message appears.

Basics

In this article, you will learn the advantages when defining actions in K8s by declarations.

Beginners Exercises

1. Read documentation in `08a/01_Intro/*` to recapture the main topics.
2. Work on `08a/02_Exercises/01/ to 03/Exercise.md` located in your repository.
3. If an error occurs, read the message carefully, think of a solution and implement it.

Advanced Exercises

1. Work on `08b/02_Exercises/01/Exercise.md to 04/Exercise.md` located in your repository.
2. If an error occurs, read the message carefully, think of a solution and implement it.
