## LU04e - Running K8s services by declaration

## Goals

- 1. I'm able to declare an action in K8s with a YAML-file.
- 2. I'm to export the YAML configuration from a running K8s deployment.
- 3. I can suggest and implement at least one measure when an error message appears.

## **Basics**

In this article, you will learn the advantages when defining actions in K8s by declarations.

## **Exercises**

- 1. Work on 08/02\_Exercises/01/Exercise.md to 04/Exercise.md located in your repository.
- 2. If an error occurs, read the message carefully, think of a solution and implement it.
