

LU04e - How K8s "self-heals"

Goals

1. I'm able to count and explain the relevant pieces of the „self-healing“ mechanism of K8s.
2. I'm able to explain the purpose of each piece in my own words.
3. I'm able to illustrate and verify this mechanism in an example.
4. I can suggest and implement at least one measure when an error message appears.

Basics

In [this article](#) you will learn how K8s „self-heals“.

Exercises

1. Read some [background information](#) before starting the exercise
2. Watch again the video cast.
3. Update an app in YOUR K8s cluster.
4. Memorize the procedure. It will become handy for future exercises.

Study case

1. Work on 07/02_Exercises/01-Exercise.md to 04-Exercise.md located in your repository.
2. If an error occurs, read the message carefully, think of a solution and implement it.
