

# LU04e - How K8s "self-heals"

## Goals

1. I'm able to count and explain the relevant pieces of the „self-healing“ mechanism of K8s.
2. I'm able to explain the purpose of each piece in my own words.
3. I'm able to illustrate and verify this mechanism in an example.
4. I can suggest and implement at least one measure when an error message appears.

## Basics

In [this article](#) you will learn how K8s „self-heals“.

## Exercises

1. Read some [background information](#) before starting the exercise
2. Watch again the video cast.
3. Update an app in YOUR K8s cluster.
4. Memorize the procedure. It will become handy for future exercises.

## Study case

1. Work on 07/02\_Exercises/01-Exercise.md to 04-Exercise.md located in your repository.
2. If an error occurs, read the message carefully, think of a solution and implement it.
