

# LU04e - Running K8s services by declaration

## Goals

1. I'm able to declare an action in K8s with a YAML-file.
2. I'm to export the YAML configuration from a running K8s deployment.
3. I can suggest and implement at least one measure when an error message appears.

## Basics

In [this article](#), you will learn the advantages when defining actions in K8s by declarations.

## Exercises

1. Work on 08/02\_Exercises/01- to 04-Exercise.md located in your repository.
2. If an error occurs, read the message carefully, think of a solution and implement it.
