LU04f - Service Resiliency

Goals

1. I'm able to count and explain the relevant pieces of the „self-healing“ mechanism of K8s.
2. I'm able to explain the purpose of each piece in my own words.
3. I'm able to illustrate and verify this mechanism in an example.
4. I can suggest and implement at least one measure when an error message appears.

Basics

In this article you will learn how K8s „self-heals“.

Study case

1. Work on `10/02_Exercises/01/Exercise.md to /02/Exercise.md` located in your repository.
2. If an error occurs, read the message carefully, think of a solution and implement it.
