LU06b - Checkout pipeline with private repository

Internal reference: learningunits/06-2.md

Goals

1. I can set up a private repo (i.e. on GitHub).
2. I can set up a Jenkins pipeline stage for checkout code from a private repo.
3. If there are any errors, I can analyze the error, suggest and test an initial workaround (troubleshooting).

Exercises

1. Setup Jenkins `06/02_Exercises/01` - according to the learning objectives (see course repository).
2. If there is an error, read the message carefully, think about a solution and implement it.
