LU07a - Basics on Code coverage

Internal reference: learningunits/07-1.md

Goals

1. I can explain what `code coverage` is.
2. I can count out (aufzählen) and explain the `code coverage criteria` mentioned in this course.
3. I can explain why a 100% `code coverage` does not guarantee a bugless software product.

Basics

This article explains, what `code coverage` is, what are the benefits when applied and what `code coverage criteria` exists. Internal reference 06-1.md

Exercises

Make your own notes while reading the article.
