

# LU07b - Applying Code coverage

Internal reference: learningunits/07-2.md

## Goals

1. I can count out (aufzählen) the basic commands for generating code coverage reports with `jest`
2. If there are any errors, I can analyze the error, suggest and test an initial workaround (troubleshooting).

## Basics

This [article](#) explains, how to set up code coverage with the node package `jest`. Internal reference 06-2.md

## Exercises

1. Work on `07/02_Exercises/a01` to `a02` - according to the learning objectives (see course repository).
2. If there is an error, read the message carefully, think about a solution and implement it.
