

Classroom50: Assignment erstellen

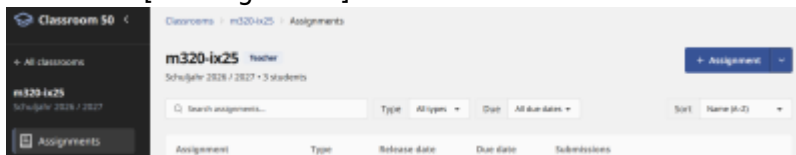

Diese Seite erklärt, wie du ein Assignment erstellst.

Voraussetzung

- Die Organisation ist in GitHub und Classroom50 erstellt [Classroom50: Organisation einrichten](#).
- Innerhalb der Organisation ist die Klasse erstellt [Classroom50: Classroom erstellen](#).

Assignment erstellen

1. Gehe zur Klasse in Classroom50.
2. Klicke auf [+ Assignment]

3. Trage den Assignmentnamen und das „Template repository“ ein

Create assignment

Details Reset

Assignment name * Assignment slug *

Description (optional)

Assignment type ☒ Individual ☐ Group project

Repository setup Reset

Start with a template ☐ No template ☒ Template repository

Create a fresh repository for each student.
Generate each student's repository from a template you provide.

Template repository (optional)

4. Setze die Einstellungen für das Autograding

Submission and grading Reset

Define what counts as a submission for this assignment: when the autograder runs and which tags a student can push to submit.

Submission type

Grading

Built-in autograder

☒ Use the built-in autograder
Set up the built-in autograder, then add the tests and runtime below.

☐ Do not use the built-in autograder
Grade with your own GitHub Actions workflow instead. With a template, add the workflow to it; without one, the assignment has no autograder.

> Autograding tests 0 tests • 0 total points Add test

External assignment in Moodle

Erstelle ein „external assignment“ in Moodle. Bei den Einstellungen übernimmst du diese Einstellungen aus dem Assignment im Classroom50:

- External assignment
- Assignment Link

Einstellungen bearbeiten

▼ Allgemeines

Assignment name	<input bankaccount"="" type="text" umsetzen"="" value="LU02.A03 - Klassendiagramm "/>
External assignment	m320-lu02-a03-bankaccount
