

Classroom50: Klasse erstellen

Jede Organisation kann eine oder mehrere Klassen enthalten.
Diese Seite beschreibt, wie du eine Klasse innerhalb der Organisation erstellst.

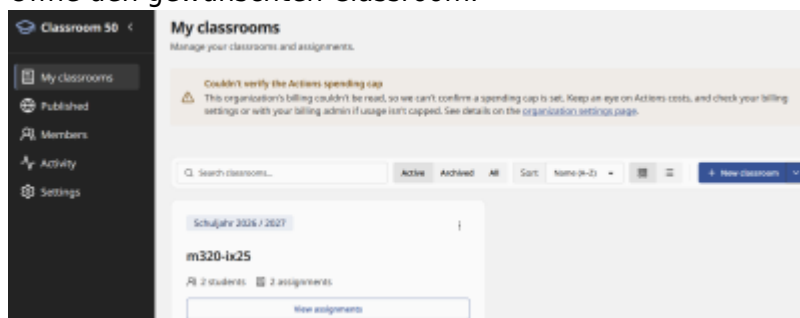

Voraussetzungen

- Die GitHub-Organisation wurde erstellt.
- Die Organisation in Classroom50 wurde erstellt.

//[Classroom50: Organisation einrichten](#)

Klasse erstellen

1. Gehe zu <https://classroom50.org/>.
2. Öffne den gewünschten Classroom.

3. Klicke auf [+ New classroom]

Classroom workflow files are out of date

The GitHub Actions workflows in this org's classroom50 repository are out of date. Update them here to keep grading, score collection, and Pages publishing working.
Heads up: Updating overwrites the scaffolded workflow files (collect-scores, regrade, publish-pages, autograde-runner) with the defaults, replacing any manual edits — you'll confirm first.

Update workflows now

Classrooms > New classroom

Create classroom

Basic information

Classroom name *

m319-ix25

Classroom slug *

m319-ix25

Classroom term

Herbst 2025

☐ Use an unlisted link for this classroom

Publishes this classroom's assignment data at an unguessable URL instead of one anyone can reach by guessing the org name. This is obscurity, not real access control: anyone who gets the link can read it, and links can leak (browser history, referrers, search crawlers). Off by default.
