

Lösung LU02.A07

```
def main():  
    # write your code below this line  
    first = int(input('Give the first number:\n'))  
    second = int(input('Give the second number:\n'))  
    #print('The average is ' + str((first+second)/2))  
    print(f'The average is {(first+second)/2}') # using fstring  
  
if __name__ == '__main__':  
    main()
```
