

Lösung LU02.A08

```
def main():  
    # write your code below this line  
    first = int(input('Give the first number:\n'))  
    second = int(input('Give the second number:\n'))  
    print(f'{first} + {second} = {first+second}') # using fstring  
    print(f'{first} - {second} = {first-second}') # using fstring  
    print(f'{first} * {second} = {first*second}') # using fstring  
    print(f'{first} / {second} = {first/second}') # using fstring  
  
if __name__ == '__main__':  
    main()
```
