

# Lösung LU02.A05

```
def main():
    # write your code below this line
    first = int(input('Give the first number:\n'))
    second = int(input('Give the second number:\n'))
    third = int(input('Give the third number:\n'))
    # print('The sum of the numbers is ' + str(first+second+third))
    print(f'The sum of the numbers is {first+second+third}') # using fstring

if __name__ == '__main__':
    main()
```
