

Lösung LU02.A04

```
def main():  
    # write your code below this line  
    first = int(input('Give the first number:\n'))  
    second = int(input('Give the second number:\n'))  
    # print('The sum of the numbers is ' + str(first+second))  
    print(f'The sum of the numbers is {first+second}') # using fstring  
  
if __name__ == '__main__':  
    main()
```
