Aufgabe 5 - Lösung

Animal

```
class Animal:

    def __init__(self, species):
        self._species = species

    def move(self):
        print("Tier weiss nicht konkret, wie es sich bewegen soll")
```

Bird

```
from animal import Animal

class Bird(Animal):

    def __init__(self, species, name):
        super().__init__(species)
        self.__name = name

    def move(self):
        print(self._species + " mit Name " + self.__name + " fliegt")
```

Cow

```
from animal import Animal

class Cow(Animal):

    def __init__(self, species, name):
        super().__init__(species)
        self.__name = name

    def move(self):
        print(self._species + " mit Name " + self.__name + " läuft")
```

Fish

```
from animal import Animal

class Fish(Animal):

```

```
    def __init__(self, species, name):
        super().__init__(species)
        self.__name = name

    def move(self):
        print(self._species + " mit Name " + self.__name + " schwimmt")
```
