Introduction

Programming source code is not possible without a propper code editor. As it happened, Webstorm is one such editor that offers us a variety of useful features, and fortunately it is free for educational purposes. Doesn't that sound great!

Assignments

- 1. Go to the Jetbrains website and log in with your credentials.
- 2. Download the the software version for your PC.
- 3. Commence the installation process (as shown in the video-tutorials)
- 4. Once the installation is complete, start the post-installation steps.
- 5. Open the command line/terminal on your notebook and connect to the database as shown in the video tutorials.
- 6. Finally, request a response from the database by entering "SELECT sysdate;". If you have carried out all the steps correctly, the database will respond with the current date and time of your PC.
- 7. Thank God that you have succeeded. Otherwise, pray to God for inspiration AND a lot of patience to find the error.
