# LU01.A03 - Installation and configuration of the MySQL database

# **Prerequisites**

Work type: IndiviualTimeframe: 15 Minutes

Expected result: Correct installed MySQL database including operational test

### Means of aid

Source	Link
Download-Link	
Download-Link	MySQL-Windows
Video-Tutorial MacOS	Install MySql Server in Macbook M1 / M2
Video-tutorial Windows	How to install MySql on Windows 10

#### Introduction

The overarching topic of Module 290 is data and how to deal with it. It therefore makes sense to start with the installation of a database. There are a variety of databases on the market. Our product of choice is the MySQL database, as the licence is free for educational purposes.

# **Assignments**

- 1. Go to the MySQL website and download the required software version.
- 2. Start the installation process.
- 3. Once the installation is complete, start the post-installation steps.
- 4. Open the command line/terminal on your notebook and connect to the database as shown in the video tutorials.
- 5. Finally, request a response from the database by entering "SELECT sysdate;". If you have carried out all the steps correctly, the database will respond with the current date and time of your PC.
- 6. Thank God that you have succeeded. Otherwise, pray to God for inspiration AND a lot of patience to find the error.

## **Solution**

#### Lösung

# **Vocabulary**

English	German
prerequisites	Voraussetzungen
overarching topic	übergreifendes Thema
free of charge	kostenios
educational purposes	Bildungszweck
to request	anfordern
