LU01.L02 - Installation of the code editor Webstorm

- The result is a fully functional Webstorm code editor including licence validity update.
- Furthermore, you can establish a connection between Webstorm and your MySQL installation.
- The function test by querying the system data and all currently installed databases is successful.

Hints

- Webstorm —> DB-Symbol —> Add a new connection—> Choose MySQL
- Add you credentials in order to get the connection to the db
- Check the basic functionality of your installation by displaying all databases that are currently installed on the db within your Webstorm
- Required commands for the terminal: „SELECT sysdate;“ and „SHOW DATABASES;“
