LU02.A01 - Solutions to DBS, DBMS and DB

Answers to the control questions

Answer the following questions respectively state the correct solution.

- 1. TRUE or FASLE: DBMS = DBS and DB?
 - FALSE, the second equation is correctc: DBS = DBMS and DB!
- 2. TRUE or FASLE: DBS = DBMS and DB!
 - TRUE.
 - A database system such as Oralce or MySQL consists of the data, stored in tables, and the database management system, that manages the data.
- 3. What is the purpose of the DBMS? Give an example.</color>
 - The DBMS is a piece of software that manages the data.
 - It consists of pre-preogrammed functions, that help managing the data.
 - Without the DBMS companies such as Zalando or Digitech would no be able to store goods or deliver them to their customers.
- 4. What is stored in the DB? How it is stored? Give an example? * <color #ed1c24>In databases basicly the data is stored in tables that are linked to each other.
 - This is done to avoid unintentional redundancies within the database.
 - <color #ed1c24>Each table (entity type: e.g. persons) is composed of columns (attributes: e.g. name, birthdate) and rows (entities: e.g. Max Müller, 12.11.1989)

Vocabulary

English	German
respectively	beziehungsweise
attribute	Eigenschaft
entity type	Einheiten Typ
entity	Einheit, Wesen
