# LU03.L02 - Designing an ERD

#### Given business case

As overreaching goal, we want to administrate our holidays. Though we want to store the following information:

- · which countries we visited so far
- how long we stayed in each country
- on which continent each country is located
- the price for each trip
- the date of each trip

## Task: Design a ERD

Analyse the given business case and design an ERD that matches the requirements of the business case.

### **Solution**

Based on the given information, we can identify three primary entity-types:

- **Trip**: Represents a single holiday journey.
  - trip\_id (primary key)
  - o start date
  - o end date
  - cost
- \*\*Country: Represents a country visited.
  - country\_code (primary key)
  - o country name
  - continent
- Visit: Represents a visit to a specific country within a trip.
  - visit id (primary key)
  - trip\_id (foreign key to Trip)
  - country code (foreign key to Country)
  - o number of days

## **Vocabulary**

English	German
prerequite	Grundvoraussetzung
