

# LU07.S01 - SQL-DDL: DB Management

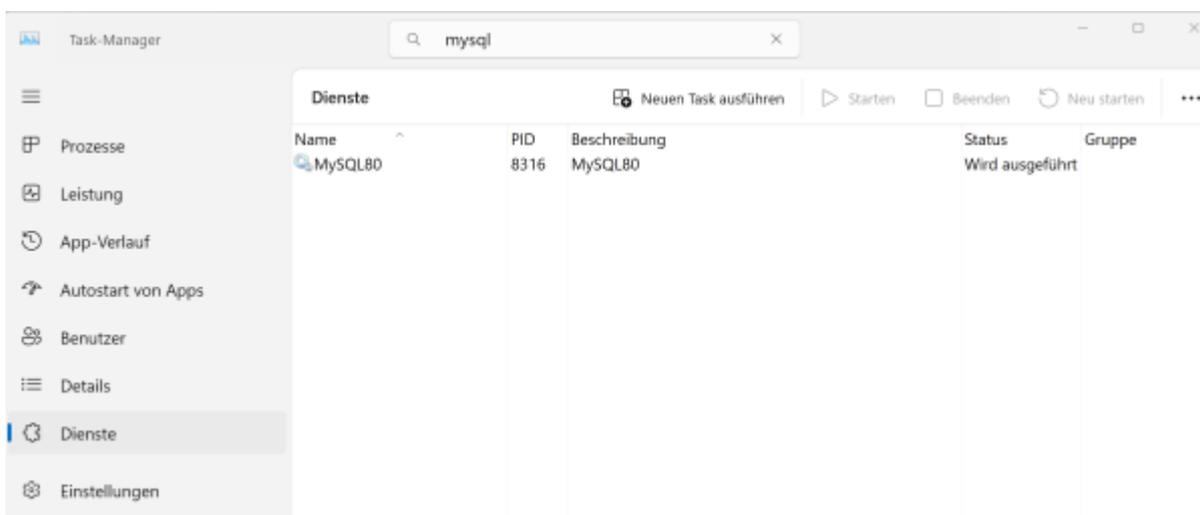

## Solutions

### Task A

Make sure, that your MySQL database system is running and connect with you webstorm editor to your database with your DBA credentials (user: root, password: yourPW).

### Windows

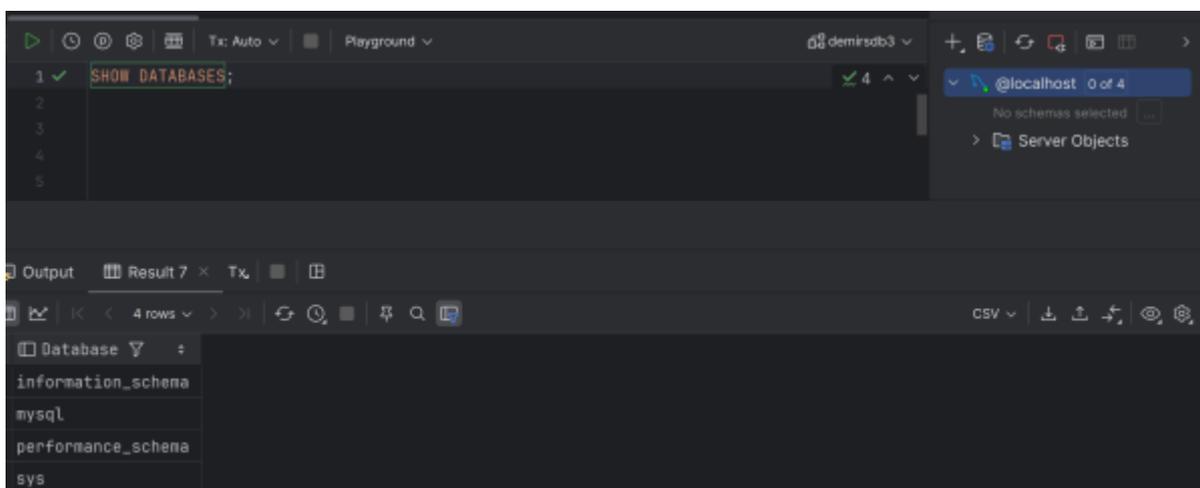

CTRL + Shift + ESC -> Dienste -> Filtering the resultset to MySQL

### MacOS ...

### Task B

Display all instances which are currently running on our database.

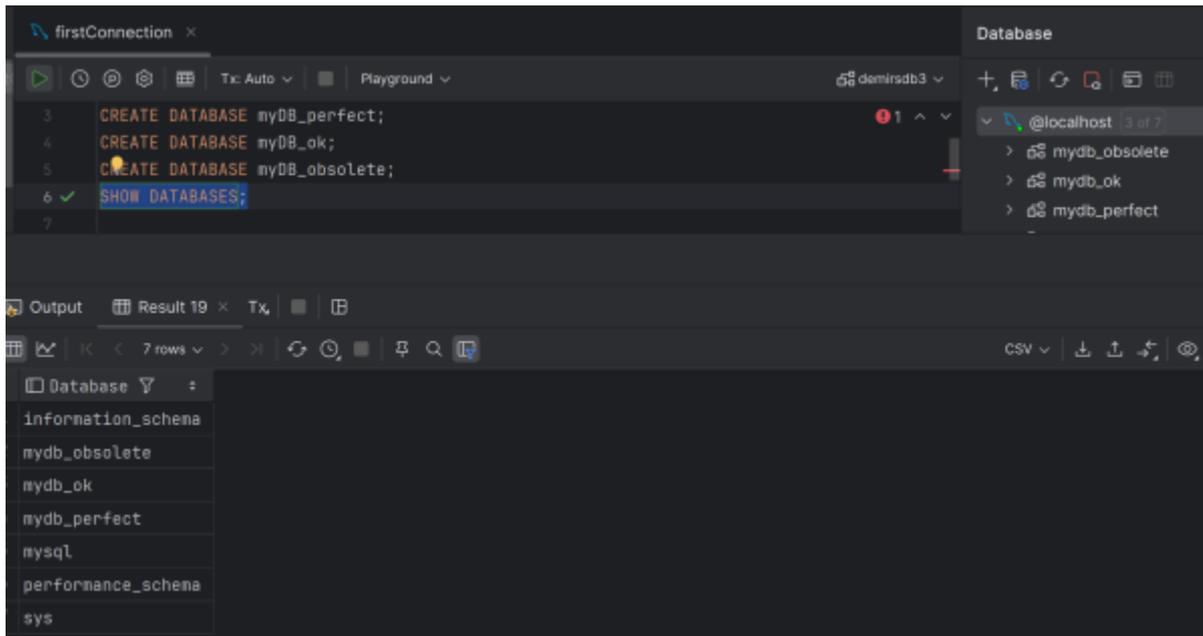

## Task C

Create the database instances

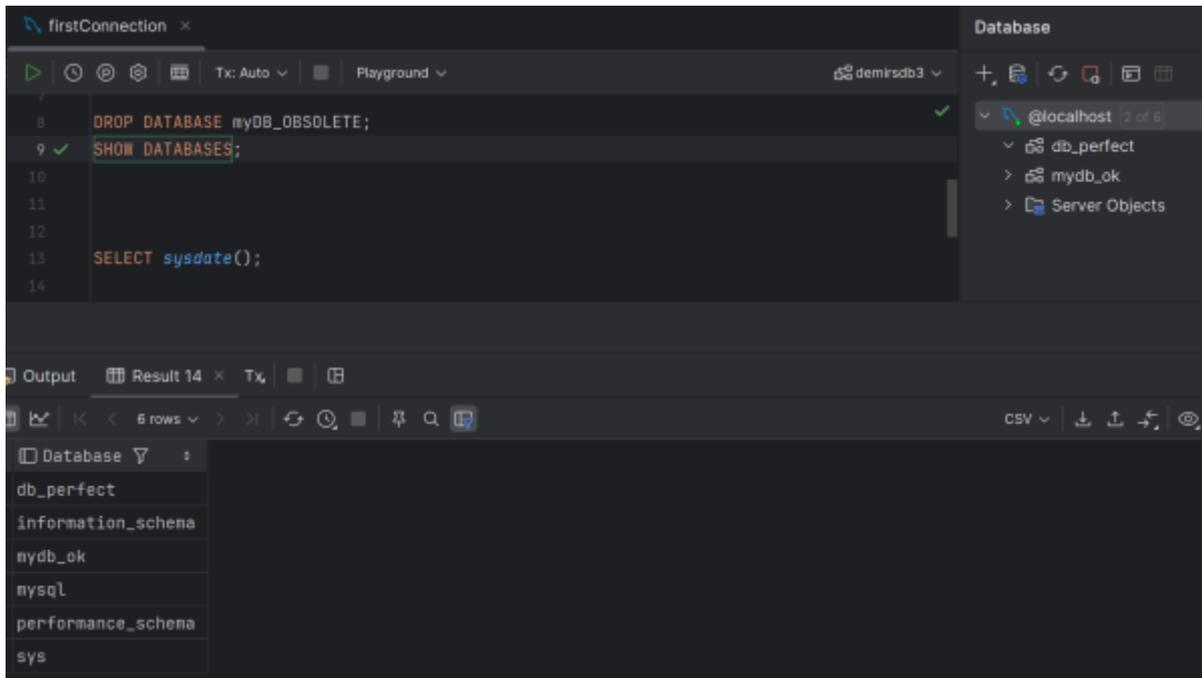

- myDB\_PERFECT
- myDB\_OK
- myDB\_OBSOLETE

and display your result.

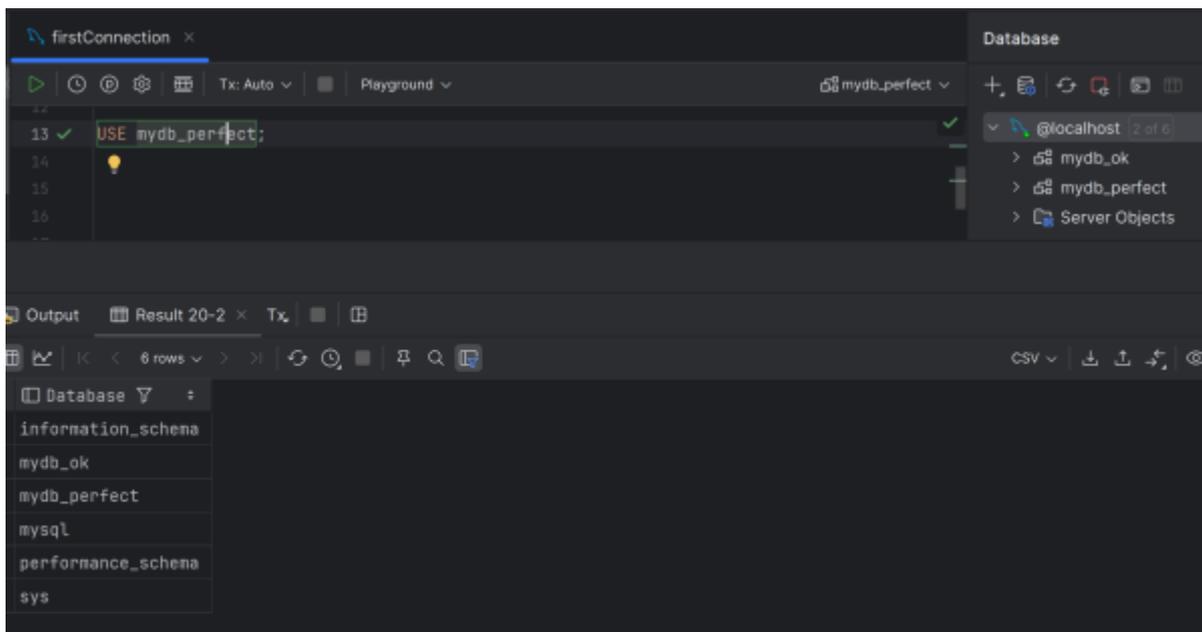

## Task D

Drop the instance „myDB\_obsolete“, as it obviously obsolete (no longer needed). Display the result.

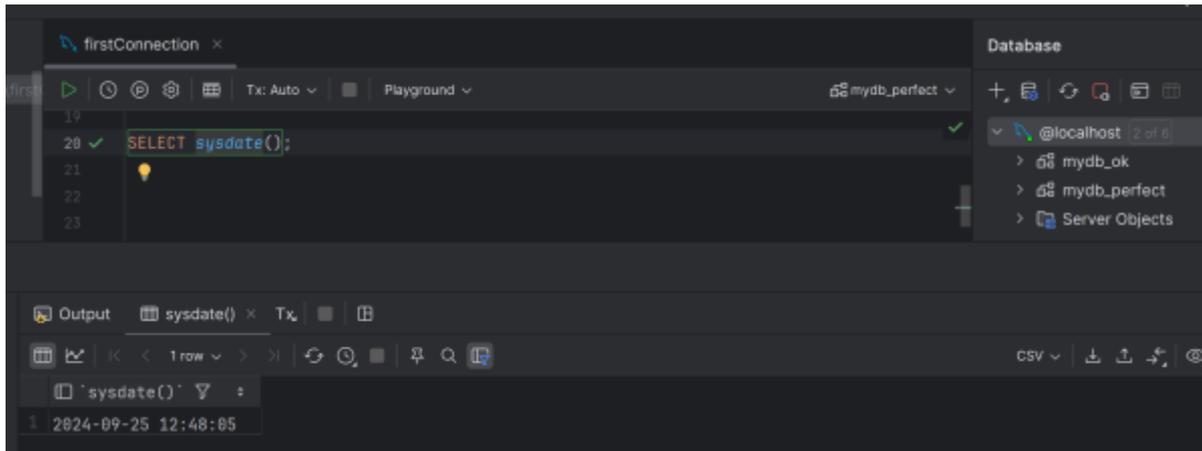

## Task E

Activate the instance „myDB\_good“ by using the USE command.

## Task F

Display the system date by using the command „SELECT sysdate();“

Congratulations!! You have just received a first respond from your database „mydb\_perfect“.

## Vocabulary

English	German
obsolete	überflüssig
credential	Berechtigungsnachweis
